

We care about the care you deliver

Eloquest Healthcare® Product Portfolio

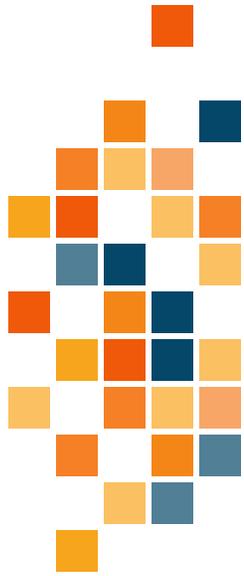

# THE REWARDS OF SAFE, COMPASSIONATE CARE

Providing quality healthcare means managing a thousand details every day, yet always finding time to listen, explain, and reassure. Caring for patients with efficiency and skill not only does good, it feels good.

Our job is to help—help you work better, smarter, more effectively—and to share your passion for safe, compassionate care. So we focus on finding intuitive solutions to specific needs. Our specialized products serve as easy-to-use, cost-effective tools that improve outcomes for patients and caregivers alike.

Detachol®

## **The Key to Safer Adhesive Removal**

Gentle enough to use on all skin types, including pediatric and geriatric, Detachol is an alcohol/acetone-free adhesive remover that quickly and easily aids in the removal of dressings, tapes, and most sticky residue from the skin and other surfaces. Reduce the physical, emotional, and monetary costs associated with traumatic adhesive/dressing removal by adding Detachol to your dressing removal protocols.

Mastisol®

### Nothing Secures Like Mastisol

Mastisol is a liquid adhesive used to secure dressings, tapes, and medical devices. Even in moist environments, its clinically proven adhesion ensures the integrity of dressings and devices. Reduce the need for costly dressing/device replacement - that can lead to an increased risk of infection - by introducing Mastisol to hospital protocols.

ReliaFit™

### The Next-Generation External Male Catheter

ReliaFit features a unique, noninvasive design that reduces the risk of Catheter-Associated Urinary Tract Infections while its one-size-fits-all configuration provides superior leak prevention and patient comfort. ReliaFit is the preferred alternative to indwelling catheters and an excellent replacement for condom catheters in male patients.

LMX4®

### Cushions the Pain

LMX4 is a topical anesthetic cream that offers fast-acting relief of skin irritations. LMX4 can be used for a variety of needs. Easy to administer and available in a variety of sizes, LMX4 is also a cost-effective topical anesthetic option.

## From the healthcaring company, products that perform

At Eloquest Healthcare®, we strive to align our priorities with yours: improving the delivery of care, reducing material costs, adding value, and achieving better outcomes. Our goal is to bring you cost-effective products that complement treatment protocols and elevate your quality of care.

## Purchasing Information:

Eloquest Healthcare products are stocked and available for purchase at medical distribution warehouses throughout the United States, Canada, and Puerto Rico.

To promote standardization and consistency throughout your organization, we cooperate with custom kit manufacturers so any Eloquest Healthcare product can be added to a customized kit(s).
