

**Mastisol<sup>®</sup> can help reduce total procedure time, ensure device and skin integrity, reduce number of dressings used, and improve overall dermal procedure outcomes.**

*Please refer to the information below  
for cost saving opportunities for your department and hospital.*

**Central Line Dressing Change Kit:**

\$4 - \$7/Kit

**Things to consider –**

- ✓ Increased opportunity for CLABSI when barrier compromised
- ✓ Increased anxiety and pain for patient during dressing change

**Foley Catheter Securement Device:**

\$2 - \$4/Each

**Things to consider –**

- ✓ Increased opportunity for CAUTI prevalence when device fails
- ✓ Increased anxiety and pain when device fails

**Peripheral IV Catheter Kit:**

\$2 - \$5/Kit

**Things to consider –**

- ✓ Increased risk of infiltration and extravasation due to catheter dislodgement
- ✓ Increased anxiety and pain for patient

**Endotracheal Tube:**

\$2 - \$30/Tube

\$4 - \$8/Tube Holder

**Things to consider –**

- ✓ Increased risk to the patient without proper airway management
- ✓ Pressure ulcers that may result from the tube holder not securing the tube properly

**Nasogastric Tube:**

\$3 - \$22/Each

**Things to consider –**

- ✓ Delay in nutrition and medication administration
- ✓ Costs associated with X-ray confirmation when necessary
- ✓ Discomfort for patient

**NPWT (Wound VAC):**

\$7 - \$15/Each for average size and \$20-30/Each for specialty size drapes (i.e. – abdominal drapes)

\$35 - \$350/Each for new dressing kit

**Things to consider –**

- ✓ Increased leak alarm troubleshooting
- ✓ Maceration of surrounding skin due to drainage leakage
- ✓ Additional days required for NPWT treatment and additional costs to rent device for extended length of time

**Ostomy Devices:**

\$3 - \$12/Each

**Things to consider –**

- ✓ Maceration of surrounding skin due to drainage leakage
- ✓ Decline in patient confidence and satisfaction
